

The Gaia's
God of Nature

*Start a
community
garden in
Lebanon, KY,
to help promote
eco friendly
habits to our
young children,
while
maintaining a
profitable
business at the
same time.*

Overview

Though the farmers market has extensive roots in other countries including Spain, Greece, and many other western European countries, it has thrived for hundreds of years in the United States. One prime example of a successful farmers market in the United States is the one located in Alexandria, Virginia.

This particular farmers market has been in business since 1753, making it one of the oldest and most successful markets in the history of the United States. It has even been said that George Washington sent his produce from Mount Vernon to be sold at this farmers market.

Meet with the CEO of the public housing to discuss extensive plans for the garden proposal. The idea was approved and supported heavily a single plot of land was provided with others discussed for possible expansion of our project.
